Subject Index Vol. 42, 1996

Supplements 1, 2 and 3 have their own Subject Indexes

Agar dilution test 240
AIDS 192
Alginate 363
Alginic acid 186
Aminoglycosides 170
Amoxicillin 150
Amphotericin B 273, 308
Anaerobes 410
Anti-alginate IgM antibody 363
Antibiograms 21
Antibiotic susceptibility tests 21
Antifungal agent 107
Antigens, whole-cell 118
Antimicrobial combinations 37
– drug detection 118
– – susceptibility 240
– prophylaxis 384
Antimycotic azoles 294
Antiseptics 248
Ascitic fibrosarcoma 443
Astragalus 286
3′-Azido-3′-deoxythymidine 192
Azithromycin 177, 186, 231, 402

Bacterial adherence 177
– glycocalyx 363
– vaginosis 78
Bactericidal activity 90, 426
BAY 12-8039 410
Biofilm 186, 363
Biological response modifier 443
Breast cancer 65
BRL 42715 334
Bronchiectasis 150
Broth dilution 107
Brown pigment stone 363
Bunyavirus 286

Candida albicans 259, 273
– *glabrata* 107, 259
– *tropicalis* 259
Candidiasis 308, 374
Carbapenems 47
Cefaclor 85
Cefepime 426
Cefetamet 85, 324
– pivoxil 1
Cefixime 85
Cefodizime 100
Cefotaxime 85
Cefpirome 426
Ceftazidime 146, 177, 426
Ceftibuten 231
Ceftriaxone 384
Cefuroxime 85
Cephalosporins 253
–, oral 11
Cetylpyridinium chloride 248
Chagas disease 294
Chemoresistance, malaria 391
Chemosensitivity test 266
Chlorhexidine 248
Chocolatized Mueller-Hinton agar 343
Cholangitis 363
Chronic obstructive pulmonary disease 227
Ciprofloxacin 140, 146, 150, 177, 354, 363, 468
Cisplatin 452
Clarithromycin 159
Clavulanic acid 334
Clindamycin 78
Clinvafloxain, in vitro activity 235
Clones 318
Community-acquired pneumonia 227
Complicated urinary infection 468
Compromised host 308
CP-99,219 439
Cycloguanil 318
Cytochalasin B 266

Defibrinated human blood 21, 118
Disinfectants 248
DNA 199
Doxycycline 11
Drug resistance 363

East African plants, antibacterial activity 315
Enterobacteria 324
Enterococci, vancomycin-resistant 235
–, vancomycin-susceptible 235
Enterococcus faecalis 432
Enterotoxins 21
Enzyme-linked immunosorbent assay 118
Epidemiological situation, Europe 11
Epirubicin 220
Erythrocyte 65
Erythromycin 11, 159
Escherichia coli 177, 206
Esophagitis 308, 374
Experimental endocarditis 133
Extracellular slime 384

Febrile neutropenia 146
Fixed multiple combination 391
Fleroxacin 280, 354, 468
Fluconazole 215, 259, 273, 308
5-Fluorocytosine 273
Fluoroquinolone 363, 439
Fluorouracil 220
Fungemia 215
Fungicidal activity 112
Fungistatic activity 112

Gastric cancer 220
Genistein 280
Genotype 21
Gentamicin 37, 206
(β1→3)-*D*-Glucan 215
Glucosylxanthone 443
Glycocalyx 186
Gram-negative organisms 348, 410
Gram-positive organisms 410
Granulocyte-colony-stimulating factor 215

H-7 280
Haemophilus influenzae 71, 85

Helicobacter pylori 315
Hematologic malignancy 215
Herpesviruses 57
High-level gentamicin-resistant enterococci 37
Human amniotic fluid 206
– immunodeficiency virus 374, 443
– peripheral mononuclear cells 192

Imipenem 146
Immune sera, rabbit 118
Immunoblots (Western blots) 118
Immunoglobulins 118
Infections, experimental murine 140
Interleukins 459
Intracellular penetration, sparfloxacin 465
Intrinsic resistance 426
Isoprinosine 192
Itraconazole 374

Josamycin 159

Ketoconazole 273, 374
Kill kinetics 410

β-Lactamase(s) 21, 334
– inhibitors 334
– stability 1
Levofloxacin 459
Lipids 65
Liposomes 170
Lomefloxacin 354
Lymphocytes 443

Macrolide antibiotics 71
Macrophages 443
Malaria therapy 391
Mangiferin 443
mec A 329
Meropenem 37, 210
– resistance 47
Methicillin resistance 253, 329
– –, *Staphylococcus aureus* 118, 248
8-Methoxyquinolone 410
Metronidazole 78
MF 922 90
Micronucleus assay 266
Microplate method 107
Microtiter broth dilution test 240
Mitomycin 220
Mononuclear cell 459
Multidisease therapy 391
Multiple antibiotic resistance 248
Mutation frequency 410

Neurosurgery, ceftriaxone 384
Nosocomial pathogens 248
Nystatin 259

Ofloxacin 227
Once-daily regimen, azithromycin vs. ceftibuten 231
OprD 210
Oral thrush 374
Ovarian cancer 452

Pathogens, respiratory 1
Pediatric respiratory tract infections 231
Penem 334
Penicillin compounds, oral 11
Penicillin-resistant *Streptococcus pneumoniae* 11
Peptidoglycan 118
Phagocytosis 118, 465
Phenotype 21
Phlebovirus 286
Piperacillin 426
Plasmodium falciparum 318
Pneumonia 227
Polymorphonuclear leukocyte(s) 71, 280, 465
Porin 210
Postantibiotic effect 354
Postantifungal effect 273
Pseudomonas aeruginosa 47, 170, 210, 363, 426
Pulsed-field gel electrophoresis 21
Purpurogallin 199
Pyrimethamine 318

Quaternary ammonium compounds 248
Quinolone 439

Red seaweed 57
Restriction endonuclease 21
Rilopirox 259
Rokitamycin 159
Rufloxacin 90

S-1 452
Salmonella 439
SDS-PAGE electrophoresis 118
Sertaconazole, *Candida* spp. 112
Shunt infection 384
SHV-5 β-lactamase 324
Sparfloxacin 37, 133, 465
Spinal injuries 468
Staphylococci 21, 133, 253, 329
Staphylococcus aureus 21, 133, 329
– *epidermidis* 329
Staurosporine 280
Sterol biosynthesis inhibitors 294
– 14α-demethylase 294
– methyltransferase 294
Streptococcus pneumoniae 240
Sulfated xylogalactans 57
Superoxide 280
Susceptibility test 107
Synergic effects 90, 294

Tazobactam 334
Tegafur 452
Teichoic acid 118
Teicoplanin 37, 343
Time-kill curves 21, 170
TOC-50 253, 432
Toxic shock syndrome toxin-1 21
Tragacanthin polysaccharides, antiviral activities 286
Trypanosoma cruzi 294
Tumour cell 199
– necrosis factor-alpha 459

Ultrasound cell lysates 118
Urinary tract infection 329

Vancomycin 146, 343

Zero-order absorption 402
